Jun 8	0.45e+18	95.9%	Beam was off for several hours.
7.52e+18		97.1%	

Some (not so good) news

- Water target started being tested for leaks at Wideband a few weeks ago.
- In the last 1.5 weeks, several cracked washers were detected (all cracks are on the inner surface of the washer starting at the center hole).
- More new washers have been ordered.
- After the washers are replaced, a 3-4 week filled tank test will be performed at Wideband to be sure the problem was fixed.
